

Econ 171 – Introduction to Game Theory
Homework Problems #2

These problems are intended to supplement the in-class lectures (as well as give you exposure to the types of problems you will see on the midterms and final exams). They will not be collected or graded. However, it is very difficult to learn game theory without working problems. Therefore, I strongly encourage you to work through them. These questions are likely more difficult than those you will see on the midterms and final, so if you can work through them completely, you should be adequately prepared to answer the questions on the midterms and final.

1. Gibbons, Question 2.6 (pg. 133).
2. Gibbons, Question 2.11 (pg. 135).
3. Gibbons, Question 2.13 (pg. 135).
4. Gibbons, Question 2.17 (pg. 136).
5. Gibbons, Question 2.21 (pg. 138).
6. Gibbons, Question 3.2 (pg. 169).
