

Experiment 3, Section 7

Problem 3.1

Part a) rise, less than

Part b) fall, less than

Part c) 180

Part d) more than

Problem 3.2

Part a) fall, less than

Part b) rise, less than

Part c) 165

Part d) more than

Problem 3.3

Table 3.7: Effects of a Sales Tax on Suppliers

Problem 3.4

Figure 3.8: Effect of a Sales Tax on Demanders

In this exercise, the competitive equilibrium price may fall in a discrete range. If that occurs, the mean price in the table below presents that range, and the profits to buyers and sellers are calculated using the midpoint of that range.

Problem 3.5

Table 3.8 Competitive Equilibrium Predictions

	No Tax (Session 1)	Sellers Pay Tax (Session 2)	Buyers Pay Tax (Session 3)
Mean Price	\$23.00	\$33.00	\$18.00
Number of Transactions	16	10	10
Total Profit of Buyers	\$192.00	\$65.00	\$65.00
Total Profits of Sellers	\$160.00	\$90.00	\$90.00
Total Taxes Collected	\$0.00	\$150.00	\$150.00
Total of Profits Plus Taxes	\$352.00	\$305.00	\$305.00
Excess Burden		\$47.00	\$47.00

Problem 3.6

Table 3.9 Comparing Theory and Experiment

	Sellers Pay		Sellers Pay Tax (Session 2)		Buyers Pay Tax (Session 3)	
	Cmp.	Exp.	Cmp.	Exp.	Cmp.	Exp.
Mean Price		\$33.00	\$30.54		\$18.00	\$16.45
Number of Transactions		10	12		10	11
Total Profit of Buyers		\$65.00	\$88.50		\$65.00	\$79.00
Total Profit of Sellers		\$90.00	\$55.50		\$90.00	\$68.00
Total Taxes Collected		\$150.00	\$180.00		\$150.00	\$165.00
Total of Profits Plus Taxes		\$305.00	\$324.00		\$305.00	\$312.00
Excess Burden		\$47.00	\$5.00		\$47.00	\$17.00

Problem 3.7

- Part a). Decrease price to \$30.
- Part b). No effect.
- Part c). No effect.
- Part d). Decrease profits by \$20,000
- Part e). No excess burden

Problem 3.8

- Part a). No effect.
- Part b). None.
- Part c). Increase price by \$20.
- Part d). None.
