## IMPORTANT TO NOTE:

- ECON 1 may be taken during Fall Quarter, but it is recommended that Calculus I be taken first
- “Change of Major” paperwork should be completed during the quarter you are taking the final prerequisite for the major (typically ECON 10A)
- The Economics Major requires 7 upper division electives. Electives can be taken during any quarter that you find appropriate, based on course availability. Major electives can be broken down as follows:
  - All electives may be chosen from Area D

**OR**

  - Up to 3 electives may be chosen from Area E and the rest from Area D
- Economics 189 and 199RA **do not** count towards the major

For more information regarding course availability, please visit the Undergraduate Courses page on the Economics website and also view the UCSB General Catalog for course descriptions and prerequisites.
